

The Miriam Hospital Women's Association

Exceptional patient care is our priority

EQUIPPED FOR EXCEPTIONAL CARE 2024

Dear Miriam Hospital Women's Association supporters:

Each year, the Equipped for Exceptional Care Committee requests department proposals for equipment that will not be funded through the annual hospital budget. Thanks to your past generosity, TMHWA has been successful in funding needed projects and enhancing the services of The Miriam for many years.

For 2024, the TMHWA Board selected two outstanding proposals to be funded. These pieces of equipment will greatly enhance the hospital's care, efficiency and exceptional service to a large number of patients and nursing staff.

i-STAT Analyzer - Medical Imaging

Radiology currently relies on an i-STAT Analyzer in the Cardiac Cath Lab to analyze blood samples for patients needing mechanical thrombectomy procedures, which are often urgent. Blood clots are a dangerous condition for patients and with its own i-Stat Analyzer, providers will receive real time and more accurate results.

BD Prevue II Ultrasound Console - Vascular Access Team

The Vascular Access Team currently owns one ultrasound machine that is utilized to place peripherally inserted central catheter lines (PICC), midlines and also any ultrasound guided peripheral IV. An additional mobile console will give staff the ability to place lines in patients simultaneously in multiple

patient care areas. Timely line placement will increase the quality of care and decrease discharge delays, thus improving patient flow and care.

TMHWA needs your support and generosity to fund these equipment requests.

‘Exceptional patient care is our priority’ in 2024. We very much appreciate all of your past support and sincerely hope you will once again prioritize the TMHWA 2024 Equipped for Exceptional Care projects in your philanthropy.

A check to fund these worthy projects will be presented to The Miriam, at:

127th TMHWA Annual Meeting
Wednesday, June 5, 2024
Ledgemont Country Club

Thank you for your ongoing support.
